Summerleaze Vets Covid-19 policy

Covid -19 policies in the UK are evolving daily and as a practice we are adapting our policies to reflect the advice from the Government.

Food production is a key sector in this crisis and we will continue to provide all veterinary support required to keep milk, beef and lamb production going. This includes fertility treatment, treating ill and injured animals and 24 hour emergencies.

All TB testing is currently continuing but we must always maintain a 2 metre distance. This will mean one person operating the crush and stepping back to allow the vet access to each animal.

Reception at the practice will have reduced opening hours of 10am-4pm. ALL medication MUST be ordered by telephone or e-mail to summerleaze@summerleaze-vets.co.uk and will be dispensed either at the door or in the drop off box to the right of the front door. As prescriptions need to be approved by a veterinary surgeon please allow 24hours for ordered medication to be dispensed.

For small holders and Horse owners, our Veterinary team is available for telephone consultations in the first instance. If advice is given or medication prescribed only, these will be charged at £18 (£15+VAT). If the Vets feel that a visit is required, there will not be a charge for the telephone consultation.

Following the government advice we will only be seeing horses and companion animals for urgent or emergency cases.

Please follow our facebook and website posts for more up to date information.
